

# I WILL CHANGE THE WORLD BY

The world we know today is facing lot of issues. People are fighting and stealing money from each other. Countries are planning war with each other. We are facing covid-19 issue as well.

I will change the world by making everyone equal. There will be no borders amongst countries. So no wars between them.

I will make everyone to think about each other. I will tell everyone to be kind and nice with others. Everyone should be happy with what they have. Everyone should have equal amount of money so there will be no stealing.

Our scientist did a fantastic job by making covid-19 vaccine. I appreciate their hard work and also feel greatful for they are doing for us. we can not forget what they have done for us. I want to be a scientist.

So I can also give contribution to make this world better.

I would like to tell people to help each other.

I hope and believe that world would be better place one day.
